

Interactive Seminar

“From Risk to Resilience in Climate Change: Creating Opportunities!”

September 18, 2017

15.00-17.30 hrs

School of Engineering, University of Edinburgh

Description: Resilience is a buzz-word when it comes to preparing for climate change and its consequences. While many resilience-related activities are policy-oriented, this highly interactive seminar is part of a range of Solution-Finding Sessions that all use the DIEM *Focused Feedback Methodology*: a ‘hands-on’ approach to collect practical recommendations. After an introduction to set the stage, the DIEM’s *Focused Feedback Methodology* pulls you inside a gripping ‘What If...?’ flooding scenario and creates a sense of co-ownership among the teams who will then be tasked with formulating their own conclusions and corresponding recommendations on what to do (better) during four *Critical Moments-in-Time* in the scenario. Within a month of the seminar, participants will also receive a report which will summarize the results of the feedback and include a trend-analysis and some benchmarking information. DIEM’s international jury will select best recommendations and team performance.

Presenter:

Eelco H. Dykstra, M.D - - The Hague, Netherlands;

- 11th Brunel Internationale Lecturer
- Director of DIEM, Expert Network and Primary Research Group

Host: Professor Gordon Masterton OBE, Chair of Future Infrastructure

How to apply:

By e-mail to: eelco.dykstra@diem.nu or diemthehague@gmail.com

Applications are welcome from both individual participants as well as from pre-established teams.

Cost:

GBP 45 for students, GBP 75 for non-students.

Please note that your participation and payment also entitles you to apply for a one-year membership in the DIEM Network in the *Student/Young Professional*¹ or *Subscriber*² categories

¹ Other than participating in the Online Knowledge Exchange (OKE) program (access to information and out-of-network contacts), DIEM operates a mentoring program in which students and young professionals can be matched with and connected to selected DIEM Partners and Experts

² Subscribers receive news, updates and can submit specific questions to our Partners and Experts. Groups of Subscribers may also be asked to function as a ‘review board’ to assess new approaches, ideas, or recommendations.
